Did you know?

Did you know that mango wood is a by product harvested after the tree’s fruit-bearing life (10-15 years)? It requires very minimal processing for production, resulting in a lower manufacturing footprint overall.

Metal Bath

Our stainless steel products boast rust-resistant properties, thanks to their composition of iron, carbon, and chromium. This alloy (mixture) ensures durability, resistance to corrosion, and longevity in every use.

What makes stainless steel sustainable?

Steel recycling is a "closed loop production"; a material eco-system where no materials are wasted and instead re-used. This drastically reduces the social and environmental impacts of steelmaking, as it saves an enormous amount of energy and water, plus, the mining of iron ore is not necessary.
