Care & Cleaning Guide

DO'S

- Use a mild soap or detergent mixed with water to gently clean rattan surfaces, using a soft cloth or sponge.
- Dry the rattan thoroughly after cleaning to prevent moisture damage and mold growth.

DON'TS

- Avoid harsh chemicals, bleach, or abrasive cleaners, as they can damage the rattan fibers.
- Do not soak rattan in water or expose it to excessive moisture, as it can cause the fibers to weaken or warp.
- Refrain from using abrasive materials like steel wool or scouring pads, as they can scratch the rattan surface.
- Keep away from prolonged exposure to sunlight or heat sources, as they can cause fading and drying out of the fibers.
